

Qubo Consulting Corp. Course Map

Are you looking to get ahead of the Quantum curve?

If you are trying to find ways to gain a competitive advantage, mitigate risk, develop Quantum Literacy, and build a Quantum Strategy, then you have come to the right place! Qubo trains Businesses, Investors, Non-Profits, and Governments about emerging, disruptive technology. We are *experts* in creating tailored educational experiences that will empower you with a greater understanding of the opportunities and threats of a Post-Quantum world.

Quantum Training.

For Business Leaders & Government Decision-Makers. Want to learn about Quantum Tech so that you don't lose your competitive advantage? Want to be an early adopter? Want help with a Quantum Strategy and identifying trigger events for your business? Let Qubo train you about the opportunities and threats associated with this new field with customized content based on your industry and technical background. We are creating 14 training modules, each one takes approx. 3 hours to complete, including lectures, breaks, tutorials, and Q&A. **Participants will receive a Certificate of Completion.**

Business Communication The Qubo Way.

For Quantum Startups. Are you a Quantum Startup that has to explain dense and difficult topics to a non-technical audience? You may know the material but communicating it to people that aren't quantum experts can be tricky. This course will teach you pedagogy from a trained educator, and give you a communication framework that will engage your audience. If you are looking for guidance on explaining difficult quantum ideas more effectively, this training is for you! **All Qubo Training offered in-person, live webinar or online (asynchronous).**

About Us.

Qubo Consulting Corp. is a quantum training and consulting company operating out of Calgary, Alberta, Canada. We help business leaders, non-profits, and government organizations make informed decisions about this emerging, disruptive technology. We support the quantum ecosystem by increasing quantum awareness and helping organizations transition to quantum by training their staff (technical and non-technical) on quantum tech, and its implications for various industries. We have partners in the quantum industry that can provide everything from proof-of-concepts to strategy development and identify trigger events for your business. We also work with quantum startups to improve their promotional and educational materials, so that it is understandable to their target audience. **We are 100% independent and have expert experience you can trust.**

What is Quantum?

Quantum Technologies use quantum properties and materials, such as atoms, ions, photons, or superconducting circuits, to do a task (i.e. computing, sensing, secure communication). The quantum landscape is expected to disrupt many industries. We create custom training for your vertical:

- Healthcare
- Fintech
- Urban Planning
- Energy
- Communications
- Insurance
- Transportation and Logistics
- Agriculture
- Manufacturing
- Cybersecurity

Technical Due Diligence

For all Investors in Quantum Startups & Technology, including Private Equity Firms, Banks, Corporations & Government. Are you investing in quantum tech? Funding a startup? Want to feel confident you've done your due diligence in making sure their tech is real? Qubo has the tools to help investors assess the technical limitations of a new quantum startup in terms of the amount of scientific and real-world proof underlying their tech. Quantum is so new that most people don't know any questions to ask, let alone the right ones! **Let Qubo be your guide.**
